You can search these sites by name, keywords or location and, sometimes, you can enter a phone number to do a reverse search.Telkom Cell Phone ContractsAs AfricacÄÄÄs biggest integrated company, mobile contracts Telkom are also part of the company's offerings. One way to access an online phone book is through your mobile device's browser. To do this, open your device and run a search for a specific online directory such as Telkom or WhitePages. Then find the search box and enter the name of the person or business you want to call. If you are looking in the Telkom directory, expect to find the name, address and phone number of the party you want to call, if they have a listed number. Other information that can be included if you are looking for a business is the company profile and a link to the company website. If you are looking at a site with a map function, you can also see a map with the fixed location and an option to get shift instructions to the place you are calling. Reverse phone number Lookup A reverse phone number is done when you have only one phone number and want to know who it belongs to before calling. To do a reverse number search, choose a site that offers the service, such as WhitePages, navigate to the phone search section and enter the number. Some results may be free, while others may require a fee to unlock the information. Reverse address search A reverse address search is another type of search you can do if you only have part of the information about the number you need to find. To do so, you type the house and street number in a search box and the city and the post code or state in the second search box before you run the query. This type of research does not provide consistent results, although it may be helpful and offers some results on map or satellite form.
