he took the jump to Emui 8.1 Based on Android 8 Oreo and his last update was still chored in Emui 9.1, ie the Huawei layer based above Android 9 feet. The update is called 9.1.0.275 (C02E10R1P9) and is the 4.05 GB download. But outside the news of Emui, who are common to many of the update cell phones, the P10 also receives the security patch of May 20, as well as other corrections and security vulnerabilities known. Many users were strange, since this would mean the third update of the operating system of the terminal, when Huawei generally leaves this support when two important emui updates were performed. Huawei also added the internal assistant to the emui 9.1 boot startup screen. The Huawei server provides intelligent reminders and news, among other personalized content. The update allows this feature by default. The Huawei P10 series, with the help of this 1-step upgrade, now can be safer than before and can manage the latest security threats found in the market.
